

Wedding Photography

Starting from \$2,980, all our wedding packages include:

- Your engagement portrait session (resulting in two 10" prints)
- Photographic coverage up to the reception (maximum of 10 hours)
- A custom designed, handcrafted, premium leather wedding album

Higher value packages include not only additional album sides (meaning you'll get more photographs in your album), but also mini albums (great for parents), prints, digital negatives (high resolution photos) and stylish, custom designed photo box sets. The more you invest initially in your choice of package, the more you'll gain in value and savings overall.

Because there are so many priceless moments throughout your wedding day, we recommend including as many album sides as possible in the package you choose. Of course, you can always order additional album sides, or albums, later as an add-on cost. It's just better value to choose the right package from the beginning.

Take some time to consider our packages and pricing, and select the package which best suits you. Naturally, I see photography as the most important investment of any wedding. OK, I'll admit I'm biased. But consider this... of all the things you spend money on for your wedding day, only your album and dress will last.

Wedding Packages:

Our Packages offer a unique collection of products to display, protect and share your wedding memories, and provide the greatest value.
